NUTRICS

Personalized nutrition, delivered as food.

Meal plans built around your goals, lifestyle and taste.

TORONTO · PRE-SEED · 2026

Eating healthy is personal. The food should be too.

People can know their nutrition goals —
and still struggle to turn them into food that fits real life.

LEARNS FROM FEEDBACK

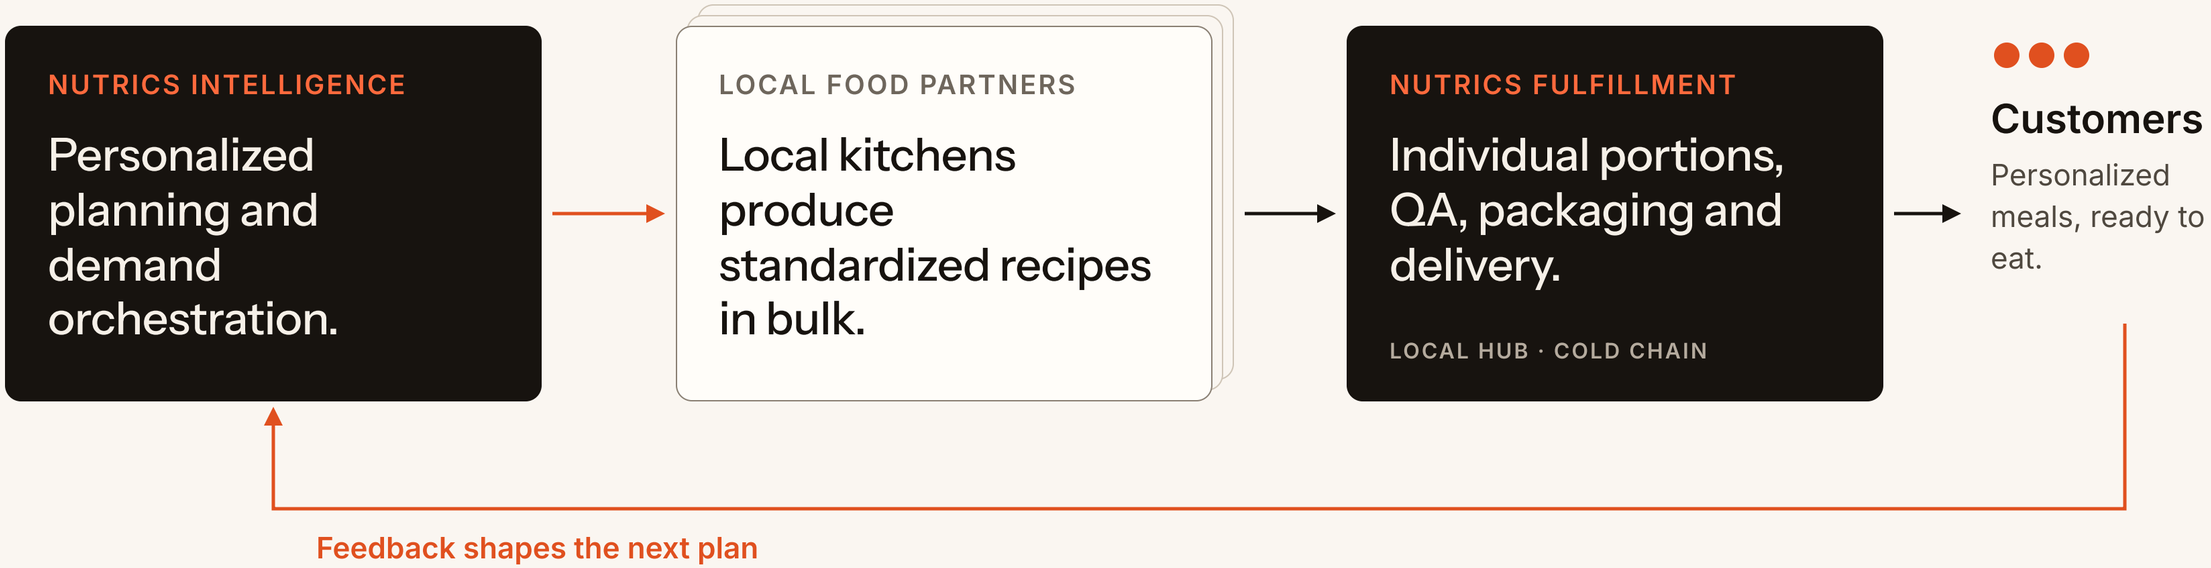

THE NUTRICS ADHERENCE THESIS

Better fit → less friction to stay on plan

Our hypothesis: when the food fits both the nutrition target and the person’s real life, consistent execution becomes easier.

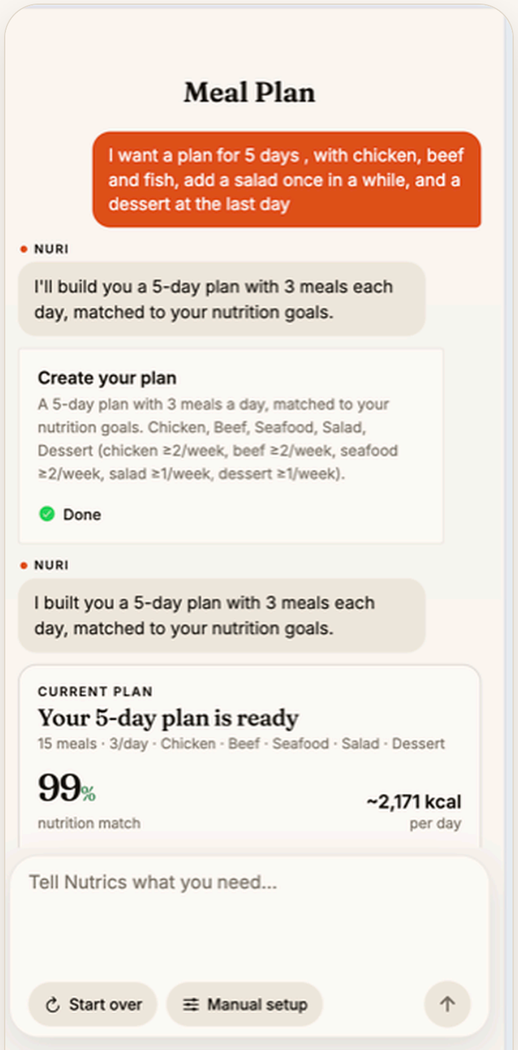

Personalization shouldn’t stop at the recommendation. It should reach the plate.

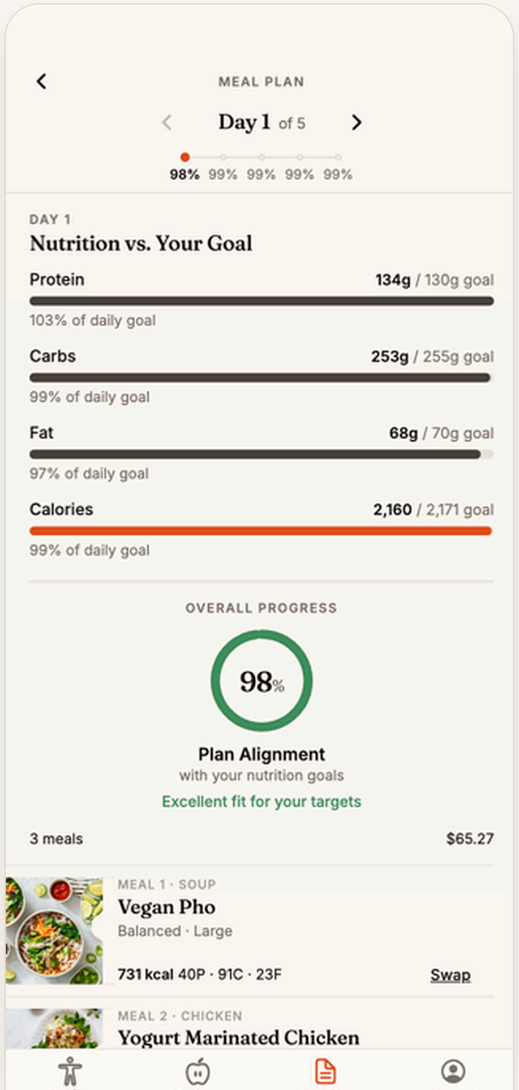

One network.
Personalized nutrition at scale.

Partners bring the flavours and culinary expertise they know best.
Nutrics turns that range into personalized meals at fulfillment.
No single kitchen, chef or menu can match that range.

One menu.
A thousand nutrition targets.

40 recipes → 1,000 profiles → personalized plans

~93%

Average calorie + macro alignment

across 1,000 simulated profiles · 4 goals · 40 recipes

INTERNAL SIMULATION — NOT CUSTOMER DATA

The menu stays small.
The plan changes for the person.

TRY THE LIVE MVP

app.nutrics.ca

Simulated 7-day plans — not what people actually ate.

The price adapts with the plan.

Nutrics prices what each customer actually needs — not one universal meal size.

C$15 / meal

Reference meal · actual price varies by plan

WHY THIS PRICING MODEL

29% cite high price vs. grocery as a reason for cancelling.

Your portion · your nutrition · your price — upfront.

External benchmark · RetentionCheck, May 2026

SAME NUTRITION GOAL · DIFFERENT WAYS TO COVER IT

5 MEALS / DAY

Smaller portions

98% coverage

~C$65 / day

3 MEALS / DAY

Mid-size portions

89% coverage

~C$60 / day

2 MEALS / DAY

Larger portions

68% coverage

~C$48 / day

Coverage = share of the customer's daily nutrition supplied by Nutrics.
Prices illustrative; actual price comes from the generated plan.

~32.8%

TARGET CONTRIBUTION MARGIN

Pricing is designed to protect contribution as portions and plan complexity change.

The economics of a reference plan.

Modelled reference-plan economics per active customer · CAD

CUSTOMER CONTRIBUTION MARGIN

Every order can improve the next.

The longer the relationship, the richer the customer context.

A prospective advantage,
not yet a demonstrated moat.

Nutrics V2 does not yet have a live customer dataset.

Build the Toronto playbook. Then repeat it.

NOW · THIS ROUND

01 Toronto

Validate paid demand, retention and unit economics.

NEXT · AFTER TORONTO PROOF

02 Canadian cities

Sign local kitchens, open a hub — no central kitchen to build.

C$5.0B

Canadian ready-meals market, 2025

Category context, not Nutrics' addressable share.

LATER · AN OPTION

03 Platform

Potential tools and channels for dietitians, gyms and food partners.

One nutrition platform. A repeatable local fulfillment model.

Stages 02–03 are future options that depend on Toronto results; no expansion or B2B channel operates today. Market: GlobalData, Jul 2026, C$5,000.5M in 2025 — complete meals that only need heating (frozen, chilled, ambient, dried).

10 · FOUNDER

I built Nutrics once. I rebuilt it smarter.

Amritpal Moomie

Founder · 15 years building production software

Nutrics V1 commercial kitchen, Dec 2017

One dish, two nutrition labels: Regular and Low Carb, Feb 2018

2017–18 · BUILT

Paying customers. Commercial food production. GTA delivery.

LEARNED

Production, delivery and customer relevance are inseparable.

2026 · REBUILT

Software-driven planning LIVE MVP

Distributed food partners PLANNED

Structured fulfillment PLANNED

Same mission. A more scalable architecture.

Toronto is our proof point.

01

Prove demand

Convert interest into paying, recurring customers.

02

Test adherence

Measure repeat purchasing and actual churn, and test whether macro-aligned, lifestyle-adaptive meal planning helps customers stay with the plan.

03

Validate economics

Validate contribution across real personalized plan configurations and reliable fulfillment.

Prove the customer relationship. Prove the economics. Then replicate the model.

C$400K

PRE-SEED

takes Nutrics from a working product to a commercially validated Toronto operating model.

Toronto commercial launch planned January 2027

Working product → Toronto launch → Repeat purchase + unit economics → Repeatable operating model

CUSTOMERS

Launch acquisition and validate paid demand, repeat purchasing and adaptive pricing.

OPERATIONS

Establish food-partner supply, fulfillment and delivery reliability.

CAPABILITY

Build the nutrition and operations team required to run the Toronto model.

The product exists.
This round validates the commercial model and prepares it to repeat.
